Train-the-Trainer  
Bridging the GAPs: Approaches for Treating Preharvest Agricultural Water On-Farm

Fruit and vegetable growers are continually assessing their operations to determine where they can limit risk and increase productivity. As a result, many have expressed interest in learning more about how on-farm preharvest water treatment systems work and how they may fit within their current setup. Come for two, ½-day virtual sessions with extension specialists from across the United States to gain exposure to this newly developed curriculum so that you may offer it to your stakeholders. Goals of the course are to teach participants about different approaches to treating water on-farm; how to implement these systems to meet requirements of the Produce Safety Rule; and how to verify that the system is operating as intended.

When & Where  
March 2nd, 1pm-5pm PST and  
March 3rd, 9am-1pm PST  
The course will be delivered by Zoom.

Who Should Attend?  
Extension and industry professionals who wish to teach courses on preharvest agricultural water treatment.

Cost & Registration  
Registration is free and includes all course resources (TTT manual, Grower Training workbook PDFs, Hands-on activity PDFs, and Module PowerPoints).  
Registration deadline is February 16th, and the course is capped at 30 participants.
